-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Restriction Requirement

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-18,39-42,45, Fig. 4-6, drawn to an eyewear system having a temple and a lens rotatably connected by mating members and a connector, classified in class 351, subclass 54.
 - II. Claims 19-38,43,44, Fig. 2, drawn to an eyewear system having a lens being rotatable within a containment structure, classified in class 351, subclass 61.

The inventions are distinct, each from the other because of the following reasons:

Each of the inventions, I-II, is distinct from the other inventions because of its mutual exclusive details. Each of these inventions recited limitations not recited in any of the other inventions. The different limitations would make the inventions patentably distinct from one another, i.e., a reference that anticipated or make obvious one of the inventions I-II would not, by itself, anticipated or makes obvious any of the remaining inventions.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, have acquired a separate status in the art because of their recognized divergent subject matter, and the search required for Group II is not required for Group I, and restriction for examination purposes as indicated is proper.

3. The above-mentioned Group I further contains claims directed to the following patentably distinct species of the claimed invention:

- A. Claim 2, drawn to the connector is comprised of a magnet;
- B. Claim 3, drawn to the mating members is convex/concave coupler;

Art Unit: 2873

C. Claim 4, drawn to the connector is a compression means.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1,8-18,45 are generic.

Claims 5,7,40-42 are not restricted and will be examined with the ^{elected} species in the invention Group I.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The above-mentioned Group II further contains claims directed to the following patentably distinct species of the claimed invention:

D. Claims 20-24,35,36,43, drawn to a turning member;

E. Claim 30-33,37,38, drawn to memory member.

Art Unit: 2873

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 19,25-29,34,44 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
